TIME BRATEN AGAIN ON THE OCEAN Once more the headlines tell the story of an ocean record heaten. More than an hour has been chipped off the time of age from this city to Queenstown. There is the usual and inevitable cutbusiasm over the announcement of this fact Interest and elation are even intensified locally because the steamship which has ade the new record bears the name of the City of New York and is also one of the ocean beauties lately authorized by Con grees to float the Stars and Stripes instead the British ensign.

Yes, it is all inspiring and the ship is a moble racer, as queenly as the metropolis for which she was named. But again, ere is the thought of the temptation to stretch something a little too far in this ocean racing. And this temptation is ined, with its accompanying risk for hundreds of lives, every time the record is made harder to beat.

Racing against time is exhibarating beating it is glorious. But for the sake of all those lives let there be care.

THE ELESCRIPTIONS

Not long since, in company with one THE EVENING WORLD physicians, a tour was made which, for sorrowful novelty and worst revelation, stands unprecedented in the

writer's experience. It was in one of the dark and mysterious portions of the great clty that the scene was laid. Entering a leng, narrow alley, a row of dingy tenements, where the numbers were chalked upon the doors in scrawling characters and the cracked and dirt-encrusted wincausing a twilight gray to pervade the place to door, tapping at each and inquiring if an sick babies were there; when negatively answered passing rapidly on to the next. where, perchance, some frail mite of human-

for the meanest cur of the gutter. Shoeless and with garments scarce sufficient to conceal nakedness, a few broken remnants of furniture, their only earthly possessions, their little ones sickening and starving, and all hungry, helpless and hope less, what wee could augment human misery

already with bitterness o'erflowing? If only the soul-melting thanks of that nother when assured that medicine and tood would be furnished, could be wafted away on the breezes and be echoed along through space, stirring in hearts the sacred fountains of feeling, no longer would want stakk boldly abroad through the city, strew-

ing disease and death in his pathway. Think of this, you who often throw away dollars on the price of a single meal! Ponder awhite the possibilities enshrined in one precious coin!

The most graphic pen would utterly fall in faithful portrayal of scenes that were witnessed. To tell of disease that languished uncared for in rooms cell-like in size, gloom and bareness; to garlang with words that should speak to the heart the suffering, sor row and squalor; to paint a true picture of poverty stripped of its mask and garb of concealment, would require the combined

genius of poet, preacher and painter. Oh, readers! you who dwell in luxurious homes, reveiling in the enjoyment of al wealth can procure, can you conceive of fel low human beings existing in places never penetrated by God's blessed sunlight, whose only outlook is upon a miserable alley recking with fifth, who to their eyes were ever cast upward, could only obtain the tiniest glimpse of the heavenly blue, who in sickness, yea, and in nealth too, thirst for the cup of cold water, and to whom abreath of pure untainted air is a luxury unknown, and whose outy portion in life is
